

Personal Style Board Prompt:

“Act as a senior personal stylist and colorist. Analyze the attached selfie and generate a 6-page “Personal Style Consultancy Board” carousel.

Each board should be a single 4:5 portrait image with a warm off-white paper-textured background, thin black hairline dividers, modern serif headings, and clean small-caps sub-labels. Keep the layout elegant, editorial, minimal, and premium.

Important: Keep my facial identity, skin tone, and natural features accurate. Do not beautify, reshape, slim, or change my face. Only improve lighting, clarity, styling, clothing, hair, and presentation.

Page 1 — Color Analysis

Top: A cleaned and brightened head-and-shoulders portrait of me.

Below: A 6-swatch “Best Palette” with hex labels.

Below that: 4 muted “Avoid” swatches with hex labels.

Right column: A short 60-word note explaining my undertone, contrast level, and overall color value.

Page 2 — Face Shape & Features

Place a centered portrait with a thin geometric overlay tracing the face shape.

Label the face shape clearly as oval, round, square, heart, or diamond.

Add 3 short bullets covering dominant features, balance recommendations, and what to flatter.

Page 3 — Hairstyles

Create a 4-up grid showing four small portraits of me with different recommended hairstyles or hair colors.

Caption each one with the style name and a one-line explanation of why it works.

Add a bottom “Avoid” row with two less flattering hairstyle options, shown with a subtle strikethrough.

Page 4 — Outfits

Create a side-by-side layout.

Left column: “Best Looks” with 3 stacked portraits in flattering outfits, labeled work, casual, and event.

Right column: “Less Flattering” with 3 stacked portraits, each marked with a subtle red X.

Footer: Add a short “Why” section with 2 sentences explaining silhouette, fabric, and neckline choices.

Page 5 — Makeup or Grooming

If makeup is suitable, create a half-face split showing bare vs. enhanced styling.

If makeup is not suitable, create a grooming-focused version instead.

Add 4 small product swatches with hex codes for foundation undertone, blush, lip, and eye tones.

Include a short 2-line technique note.

Page 6 — Takeaways

Top: Show my portrait in the single best recommended overall look.

Below: Add 5 “Rules To Live By” in small-caps style.

Keep the advice practical, polished, and easy to follow.

Style Guidelines For Every Page:

Background: #F5F1EA warm off-white with subtle paper grain.

Headings: modern serif, Playfair-style, title case, around 48pt, #1A1A1A.

Sub-labels: clean sans-serif, Inter-style, small caps, around 14pt, #5C5C5C, with 0.1em letter spacing.

Dividers: 1px solid #1A1A1A.

Color swatches: 56px circles with hex codes shown underneath in mono font.

Edge padding: 80px on all sides.

Aspect ratio: 4:5, 1080x1350.

Output: Render as 6 separate carousel images or one clean concatenated grid.”

How it works:

Copy the prompt, upload a clear selfie, and let AI create a personalized style board with your best colors, hairstyles, outfits, and overall look.
